1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter I).

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).

2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

None

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KR, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Box No. I

Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
☐ This opinion has been established on the basis of a translation from the original language into the following language
_____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material
☐ a sequence listing
☐ table(s) related to the sequence listing
 - b. format of material
☐ in written format
☐ in computer readable form
 - c. time of filing/furnishing
☐ contained in the international application as filed.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

—Claims 1 and 6—

Both documents 1 and 2 describe an access point wherein antenna means and signal conversion means are stored in an antenna case, and information processing means is stored in a main body case separate from the antenna case, and the antenna case and main body case are connected by a fixed line cable for transmitting a signal between signal conversion means and information processing means.

Further, documents 3-6 cited in the ISR all describe providing signal conversion means for converting between radio wave signals and digital data signals, and connecting the antenna body with the main body case by a fixed line cable for transmitting a digital signal.

Therefore, the inventions of claims 1 and 6 do not appear to involve and inventive step based on documents 1-6.

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Continuation of Box V:

--Claim 2--

Documents 3-6 describe signal conversion means having frequency conversion means for converting between radio wave frequency signals and internal frequency signals with a frequency lower than the relevant signal, modulation and demodulation means for performing modulation or demodulation between an internal frequency signal and a baseband signal, and baseband means for converting between a baseband signal and digital signal.

Therefore, the invention of claim 2 does not appear to involve an inventive step based on claim 6.

--Claim 3--

Making a digital signal transfer into a serial transfer or parallel transfer is a common means in the relevant technical field.

Therefore, the invention of claim 3 does not appear to involve in an inventive step based on documents 1-6.

--Claim 4--

Documents 1 and 2 describe a fixed line cable that transfers a control signal or supplies electrical power to antenna means or signal conversion means in addition to transmission of an analog signal.

Therefore, the invention of claim 4 does not appear to involve an inventive step based on documents 1-6.

--Claim 5--

Using coaxial cable for the fixed line cable is a matter that could be appropriately selected as required by a person skilled in the art, as can be seen in documents 1-6.

Therefore, the invention of claim 5 does not appear to involve an inventive step based on documents 1-6.
